

Say NO To Tiny Paychecks!

Say YES to FREE Daily Income!

You do NOT need to PAY ANYTHING to earn good money online!

I thought I was going to spend my retirement years on the wrong end of a spatula for a while and that was NOT my idea of a good time! Look around the Fast Food joints and see how many seniors are stuck doing that today.

Instead I learned about Compound Interest and Commissions that even newbies can make money from (with ZERO RISK), so I started helping others get the cash flow they needed and it turned things around FAST.

I started this concept in December of 2008 and made money my FIRST WEEK and have made more every week since then. I help people get started that have never made more than a few pennies online and if they get past the initial small earnings, it thrills me to talk to them as they start to grasp the full power of compounding and see it go to work growing their future. All it takes is patience and a few minutes a day to keep it alive.

My first big success was **Ad-Ventures4u** and at the time I first wrote this report, I was earning over \$6,000 a month that I had grown from \$260 in money I earned clicking on ads for a penny or two each. I learned how to get others to help me, so that's how I got that much money to start with. I NEVER took a cent from our family budget, it all came from the Internet. I don't tell you this to brag, just to point out that I have something to teach.

Ad-Ventures4u changed policies and is no longer an option for me, but I learned that if I applied the same concepts I learned there, they worked just the same with other programs. They are UNIVERSAL!

Sure it would be sweet if everyone had \$10,000 they could withdraw from savings and start earning good money from day one, but I know that's not feasible for most people and would be much too risky even if they could. That's why I set up free feeder plans to make it self-funding, the same way I did it when I started. Then there is never any risk to your home budget.

The easiest way is to allow yourself to be advertised to and get paid for it. Someone gets paid every time an ad gets shown, it might as well be you!

The first plan I am going to lay out here is for people who live in the United States and can get a free [AlertPay](#) account to use for transferring money online. Don't worry, I have used them for years and it's safe, especially since we never put our own personal money in there.

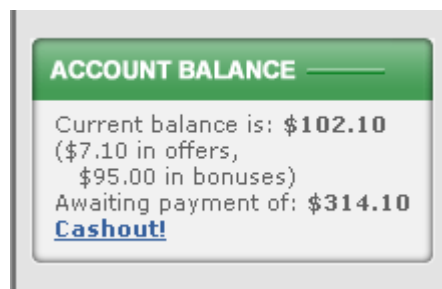

Start by getting a free account with [Fusioncash.net](#), a free sponsored offer program that works perfect for this plan. They have offers and bribes to entice us to try new products and services, but the real money is in getting referrals **EVEN IF YOU NEVER HAVE BEFORE!**

They pay a nice \$3 bonus for every new person you get that validates their email address and then completes at least one sponsored offer. **If you don't think you can get referrals, you can still earn, just slower.**

I have been using this as a feeder program since December 2007 and they pay as agreed every time. You need to have \$25 in earnings with at least \$15 of that from completing offers in order to cashout, but if you're not in a big hurry that 's very easy to do. I use free offers that do NOT require a credit card and even though the one I use most only earns me 15 cents, you can earn it daily and add it to the bonus dollars you get for referrals.

My referrals just keep adding bonuses slowly as I build up the \$15 in offers I need to cashout, but that's just fine with me. When I do get paid, I put it in my Genius Funds and keep earning more every week like a big giant snowball rolling downhill. It's Amazing to watch!

On 10-16-09 I requested a cashout of \$314.10 with another \$102.10 already in the pot for next time! Once the pipeline is filled, it just keeps spitting out free money.

This is not get rich quick, it takes some time to get the machine humming and spitting out cash, but once that pipeline is filled it runs on autopilot. You just need to give a report like this away with your links in it and I show you how to do that too. Last night I even had a telemarketer that called to pitch me that ended up promising to visit my website. There are people all over the world that need more money in this economy!

Well that's my story, now you just need to decide if you are willing to risk the time (no money) to make it all work for you. Of course if you have a spare \$100 lying around, you can skip the feeder plan and start earning enough to talk about with Genius Funds, then get referrals from your own success story. People want to hear how you did it, not just see links.

Believe me, I meet new people every day that have been desperately searching for exactly what we have here, sometimes for YEARS. When they truly comprehend it, you can't hold them back from getting involved. I have a friend that could NEVER get referrals, now he has plenty and they are earning him commissions to go with his expanding income. You bet he's excited and he calls me every time he gets paid more free money.

Look around on my YouTube Channel and you will see everything I do now is focused like a laser beam on making free money. I think it's great fun!

All it takes is about 5 minutes while you are checking your email on the side. It truly is that easy and there is no risk but a little time.

I want to say right now that I bend over backward to help my referrals, but don't expect me to do it all for you. This has truly been the key to the vault for me and that's why I think it's the best shot you have to get to this level too. I have seen all the rest and using free money is the best!

P.S. A good semi-passive approach would be to use Fusioncash daily then deposit cashouts into Genius Funds and watch it grow every day.
